

OUR OFFER

We invest and believe in the value of **training** and the growth of high-potential **young people**: in Baglioni, several key roles are now filled by staff who entered after graduation.

We recognize the value of people and their time: you will have **flexibility and autonomy** in light of increased accountability on results.

An **international group** on three continents will give you the opportunity to travel, learn and **work in synergy** with other cultures.

Join our team, **participate in our vision for the future!**

“ LUCK IS WHAT HAPPENS WHEN PREPARATION MEETS OPPORTUNITY ”

INTERNATIONAL PRESENCE

Baglioni SpA is a world leader in the production of **pressure equipment** for storage and processing in the compressed air, industrial gas treatment, oil & gas and hydrogen markets.

We are present with our plants on **three continents** in search of innovative solutions for our customers. Our **goal of internationalization** and diversification allows us to seize all opportunities while maintaining strong ties to historical productions.

Through **centralized product engineering** we coordinate our **9 plants** and guarantee the same standard of quality.

TRADITION AND DEVELOPMENT

Since **1968**, we have been a Group that grows and creates value: the company is constantly evolving. We invest in **new markets** and in the **development** of our equipment and machinery, designed and manufactured in-house.

We apply the Agile methodology to identify **digitalization projects** to develop. We believe in the value of **safety** for our employees.

We participate in the European goals in terms of **energy transition** with our business, particularly in the world of Green Hydrogen.

GROWTH

Thanks to our established know-how, we have engineered, industrialized and delivered heat exchangers, air-oil separators, pressure tanks and scrubbers for **international and emerging markets**.
